GRANITE MATERIAL SELECTION PROCESS

1. Go to Century Marble and Granite upon commencement of project

2. Upon arrival you will be asked to fill out a selection sheet.
The Fabricator is: **House of Stone - Dino Atlas.**
3. Browse the showroom and write down 3-5 of your favorite selections:
 - Only look at Granite, Quartzite, Soapstone and Marble
 - *Quartz CANNOT be used outside, it will fade/discolor*
 - Darker colors will get warm/hot if exposed to direct sunlight, something to keep in mind if you plan to use the area during the day
 - Polished finishes show a lot of the dirt and grime and requires lots of cleaning
 - Leather and honed finishes look great outside and hide some of the dirt and grime
 - Feel free to take pictures and ask for samples, however, they may not have every sample that you may request as they do not cut stone
4. Return the material selection sheet when finished browsing. They will forward it to the Fabricator for pricing.
 - Please take a picture of the sheet and forward it to your sales rep for back-up in the event it gets misplaced
5. Upon final measurement, pricing for your selections will be emailed to you.
 - Pricing varies from slab to slab and material to material, your allowance will be applied to the total cost
 - You have the option to return and tag the specific slab(s) if you desire
6. After the material is selected and/or tagged, the fabricator will begin their process. This process can take 2-3 weeks.
